

1 **Abstract of Disclosure**

2 A reclining module is disclosed for a recliner that includes two side
3 frames. The reclining module includes a backrest frame for pivotal
4 connection with the side frames, a stool frame for pivotal connection with
5 the side frames, a principal link connected between the backrest frame
6 and the stool frame, and a hydraulic cylinder connected between the
7 backrest frame and the stool frame. The hydraulic cylinder includes a
8 handle movable from a first position where the hydraulic cylinder cannot
9 be extended and withdrawn to a second position where the hydraulic
10 cylinder can be extended and withdrawn.
